

## **Artist Information**

I am an artist whose work invites the viewer to consider various topical issues, particularly those dealing with contemporary consumer lifestyles and the impacts of these on the environment. I am intently interested in making works that engage your eyes, body and mind.

Most of my research results in paintings or small sculpture. My paintings often use a collage aesthetic to combine imagery, painting techniques, pattern and forms. I also enjoy combining the practices of art and craft. This pursuit produces works that utilises craft techniques with everyday objects to make interesting metamorphoses and contextual changes to these objects.

I completed a Visual Arts Degree with Honours at the School of Art ANU in 2013. I have had numerous solo and group shows in Canberra and interstate since graduating.
