

Beatrice Magalotti

I am a Melbourne based artist. During September – October 2019 I was one of the artists at the Hollufgård artist residency in Denmark. For two months I worked and lived with other international and local artists in a new and unfamiliar environment. This challenging residency was a perfect way to obtain critical feedback on my work and to produce a significant new body of work.

I have been exhibiting on a regular basis; my next exhibition which I am currently working towards will be in October 2020 at Red Gallery, North Fitzroy, Melbourne, I will be exhibiting works that were part of both my Icelandic and Danish art residencies

I work in a variety of media, currently working in bronze. Before casting in bronze, working in wax enables experimentation and play. I have been exhibiting on a regular basis.

I completed her BA, sculpture at Prahran in 1985 and Curatorial Postgrad at Melbourne University in 1992.
