

CV Iris Koffijberg

Iris has a master in art and art policy (1994 Rijksuniversiteit Groningen). She worked for many years in the cultural sector as a production manager, business leader and fundraiser. Though she has photographed her whole life, it wasn't until 2011 that Iris started with experimenting and photographing water, following the images in her head, trying to bring them alive and discovering other images while doing so. In 2013 she had her first exhibition. After two years she quit her job to become a fulltime artist. In 2015 she won a local competition in which water was the central theme. In 2017 her work was selected voor the national Summer Exhibition in Museum de Fundatie in which water was also the central theme. Since then she steadily grows as an artist, finding new pathways to express herself.
