

Anthony Carey Bio

To fulfil a promise made to his father as a teenager, Anthony Carey (b. 1965) is currently studying for a BA in Creative Arts. Influenced by abstract expressionism, Carey's work is fuelled by personal relationships and perceptions of memory.

Following a series of personal traumas, Carey found refuge in art. Working intuitively, he has developed a passionate relationship with colour and texture that allow him respond to negative emotion from recalled memory. His work concerns itself with pathways to consciousness, to create something tangible based on ghosts from his past, captured through residues of colour and texture.

His work has been included in The London Art Biennale 2021, Alternative Kilkenny Arts Festival 2021, Sculpture in context 2018, with upcoming group shows in Berlin and Amsterdam. His first short film, 'Story', created in 2021, has been selected by multiple film festivals worldwide and won numerous awards
